“ *I remember that that big red b**** would drive him completely crazy, hw couldn't ever figure out how to get the thing to not vibrate bolts out of it left and right and would swear about it all day long. And I remember those last couple of weeks helping him design that goofy gas tank that he wanted to shoot with a damn gun and make a old school gas level in it we went back and forth about how to epoxy it and clear it and figure it out the best way it would be functional. Ryan I miss u man I wish I had gotten more time with you.*

“ I dont think i ever told him that i loved him. But i was in love with him from day 1.

I appreciate the time i did get with him.

I only wish he had reached out and said something. I would've been there in a heart beat.

You will be missed Ryan, DK.

I love you and you will forever be in my heart

If anyone can please tell me how to contact the family, I would appreciate it greatly. Thanks
